

Workshop Organised.

A hands – on workshop / training programme for medical and non – medical scientists was organized from 23rd Jan – 10 Feb 2006 on ‘ Molecular diagnosis of Thalassemias, Sickle cell disease, G6PD deficiency, Hemophilias and application of cytogenetics in the diagnosis of genetic disorders. This was organized under the project entitled ‘ Training centre for molecular genetics, cytogenetics and cell biology – applications in hematological disorders’ funded by Department of Biotechnology New Delhi.

The following staff members of the Institute delivered lectures in this programme.

- 1. Dr. K. Ghosh. – Genes, Dreams and realities.**
- 2. Dr. R.B. Colah – β thalassemia – molecular genetics and prenatal diagnosis.**
- 3. Dr. A.C.Gorakshakar – Sickle cell disease and its molecular genetics.**
- 4. Dr. M.B.Mukherjee – G6PD deficiency – prevalences, Screening and Molecular genetics**
- 5. Dr. S. Shetty – Molecular genetics of hemophilias, carrier detection and antenatal diagnosis.**
- 6. Dr. V. Babu Rao – Advances in human cytogenetics.**
